

Iris B22 LED Bulb

Product Code: LBWL-IRIS-T-C35-B22

Our classic LED bulbs are designed to replace traditional incandescent bulbs as they produce a similar brightness and colour temperature, as well as being dimmable and offering exceptional value for money. Iris is a classic C35 Candle style LED bulb, one of the most versatile bulbs, suitable for ceiling chandeliers, floor, table and wall lights. The 2700k colour temperature is great for general task lighting and with 310 (2700k) lumens, it's brighter than a 25w incandescent. Set within beautiful clear glass, these bulbs feature a criss-cross cluster of match-stick filaments that enable even light distribution and boast a CRI of 93.
