

## Astra E14 LED Bulb

Product Code: LBWL-ASTRA-T-G45-E14

Our classic LED bulbs are designed to replace traditional incandescent bulbs as they produce a similar brightness and colour temperature, as well as being dimmable and offering exceptional value for money. Astra is a classic G45 Golf Ball style LED bulb, mostly used in floor, table and wall lights. The 2700k colour temperature is great for general task lighting and with 310lumens at 2700k it has slightly more brightness than a traditional 25w incandescent. Set within beautiful clear glass, these bulbs feature a criss-cross cluster of match-stick filaments that enable even light distribution and boast a CRI of 93.
