

LO B22 LED Bulb

Product Code: LBWL-LO-F-T45-U-B22-C

Our decorative LED bulbs produce a low level, very warm light, perfect for creating a relaxing ambience or in a statement decorative lighting piece. Lo is a classic T45 / Radio valve style LED bulb, with a very warm colour temperature of 2200k, which provides a relaxing ambience at a market leading 95 CRI. This is definitely a bulb for decorative use in bedside tables, table lamps or wall lights. It's not intended for solo use in a ceiling pendant, but multiple bulbs look great in a cluster or chandelier, and four Lo's together nearly provide the same brightness of our 60w incandescent with lower overall running costs and a more decorative feature.
