

Flo E27 LED Bulb

Product Code: LBWL-FLO-H-T30-185-E27-C

Our decorative LED bulbs produce a low level, very warm light, perfect for creating a relaxing ambience or in a statement decorative lighting piece. Flo is a classic T32 / Test Tube style LED bulb, with a very warm colour temperature of 2200k but a bright 460 lumen output, which provides a relaxing ambience at a market leading 95 CRI. This is definitely a bulb for decorative use in table lamps or specific wall lights. It's not intended for solo use in a ceiling pendant but we specify it as part of the design feature of our Stocksmoor range.
