

## Maythorne Large - single wrought iron pendant light

Product Code: PLMAYTHORNESGLARGE

Our large Maythorne pendant light is one of our most popular ceiling light designs. Created by the #happyblacksmith, the entwined tendrils of steel are forged in a loose, fluid swirl around a large LED globe bulb. The 4 strands are twisted in alternating directions to create a standout design that creates a great centre piece in a lounge, hallway or dining room setting. It can be paired with a contrasting colourful cable, set at a height to suit your needs and easily adjusted. This organic shape always attracts admiring looks as there's little else like it and each one is hand forged creating a subtly different unique shape. Measuring approximately 400mm diameter at the base, it's the perfect size for most homes. The British made E27 fitting allows a vast choice of bulbs although we specify a G125 globe bulb (sold separately) as it works in harmony with the light and the twisted filament of the Well-Lit 'LUNA' bulb is the best available. Paired with matching Maythorne wall lights or alongside a smaller Maythorne pendant this unique piece offers a striking focal point in your home.

**£495.00**

Availability - Dispatched within 3 weeks
